Oct 2023 – Present

- Developed and maintained dashboard and website pages using Vue.js.

- Built and optimized reusable components for scalable applications.
- Implemented best practices for SEO and performance.

## Front-End Developer — Codebase – Egypt

Jan 2023 – Nov 2023

- Diagnosed and resolved frontend bugs and performance issues.
- Ensured adherence to security and data privacy policies.
- Collaborated with backend teams to integrate APIs and improve UX.

## Education

### Intensive Code Camp (Front-End Development)

ITI Alexandria – 2022

### Bachelor of Arts in English Language and Literature

Cairo University – Ongoing

## Courses

- Web Development Challenger – Udacity (Apr 2022): HTML, CSS, Bootstrap
- Web Development Professional – Udacity (Jul 2022): JavaScript, Node.js

## Projects

### 1- Full-Stack E-Commerce Platform – Wholesale Market

Technologies: **Backend (Laravel):**

- Complete backend built with Laravel.
- Full REST API for handling data and requests.
- User authentication with **Seller & Dealer roles**.

- Comprehensive dashboard for managing products, customers, pages, categories, orders, promotions, and notifications.
- Online payment gateway integration and support for **Cash on Delivery (COD)**.
- Notifications system with user delivery support.
- Access control with **Middleware** and **Role Permissions**.

#### Frontend (Vue.js + Vite):

- High-performance Vue.js user interface.
- Code Splitting and Lazy Loading for faster page load.
- Strong SEO with optimized **Meta Tags** and **OG Tags**.
- Fully responsive design for mobile devices.
- Advanced search and filtering system.
- Invoice generation system.
- Customer management system for distributors.
- Distributor earnings management system.
- Admin data export to Excel.
- Shopping cart, wishlist, and user account management.
